

HEATING CABLES / Câbles chauffants

AUTOREGOLANTE

SELF-REGULATING / AUTO-REGLABLE

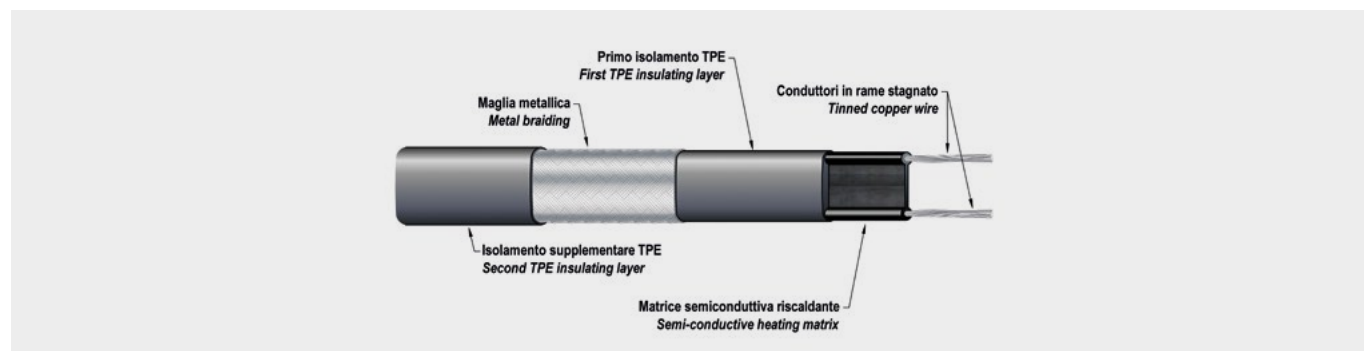

Cavo scaldante utilizzabile in molteplici applicazioni per il mantenimento della temperatura o come antigelo. Permette di aumentare o diminuire la potenza proporzionalmente con la temperatura esterna. Fornito in bobina, da tagliare a seconda delle esigenze.

[EN]

Self-regulating cable used in many applications to keep the temperature or as non-freezing system. It increases and decreases its power according to the external temperature. Supplied in reels, to be cut as required.

[FR]

Câble chauffant utilisé dans plusieurs installations pour garder la température ou contre le gel. Il augmente et diminue la puissance selon la température extérieure. Fourni en bobine pour être coupé selon les besoins.
